WARRANTY INFORMATION

Without prejudice of legal warranty Fiamm products are warranted 1 year from the date of purchase for defects in material or workmanship, provided that no deterioration of the product has been made and upon presentation of proof of purchase. Warranty does not cover any damage caused by misuse wrong installation or caused by non Fiamm products. Any non-defective product will be returned to the sender at its own cost.

DESCRIPTION

The antenna is called “smart” as it includes the Digital Radio receiver. The sound is transmitted to the amplificator and loudspeakers via your car existing Aux-In. Control of the radio (mainly channel selection) is done via your smartphone using Bluetooth wireless technology.

SMART PHONE APP

You can download the application from the App Store or from Google Play.
The application is free of charge and will be updated regularly. You can also find the application for download on the Fiamm Smart Antenna website.

REQUIRED CONFIGURATION

Smartphone :

-Android 2.3.3

-iOS 4.3

Vehicle :

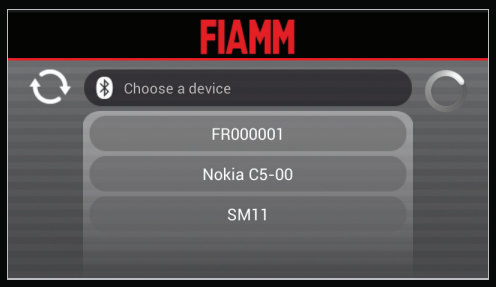
-Audio system including Aux-In

-Standard 12V power system

First use

Once the app is installed on your smartphone you have a new icon (FIAMM) on your application board :

The pairing mode will be automatically launched at first use. Select the Bluetooth device corresponding to the SM11 antenna.



In case of problems with the pairing go in Settings of the smartphone:

Enter on “Bluetooth” settings

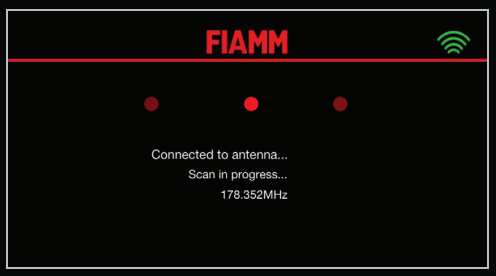
- Search for new devices
- Pair the smartphone with FIAMM

SM11 Antenna

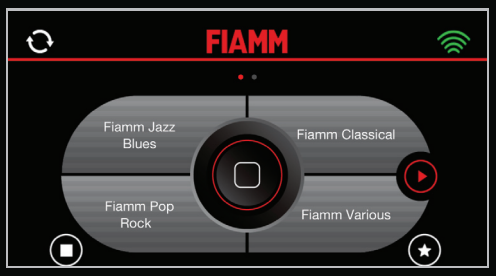
- Return on the application board.
- Tap on the FIAMM icon.

The antenna will connect to the smartphone (it can take up to 4s).

The system automatically start a scan band to resister all available station (it can take several seconds)



A screen with all available startions will appear. Browse them using the red triangle .



Tap on the desired station.

Use the central button to return on the stations’ list.

Main screen has the following icons:

Tap this icon to refresh the list of the available stations.

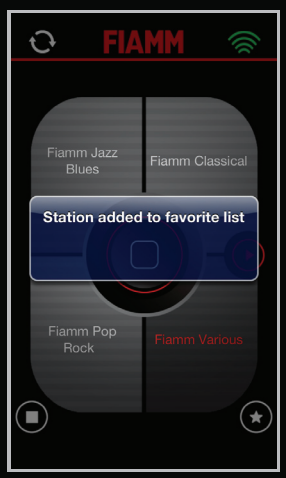
This icon shows the effective pairing between the antenna and the smartphone.

Mute.

Tap this icon to show the favourites list of stations.

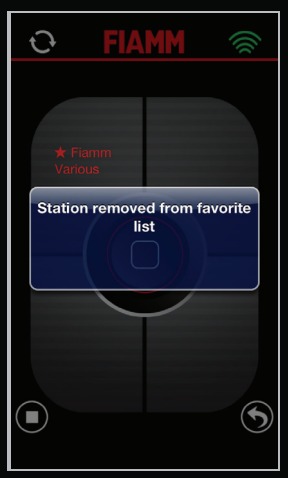
Radio reception levels.

To save a station on the Favourites, tap and hold the button of the corresponding station.



A message will confirm.

To remove a station from the favourite list, go to the favourites screen, then tap and hold the button of the station you want to remove.



A message will confirm.
